Attachment to Advisory Action

The new issues are related to the claimed term "harvested" microbes and the new issues require further consideration(s) including possible search.

Applicants arguments filed 8/01/2005 have been considered but not found persuasive because they are mostly based on the newly raised issues with respect to the meaning and criticality of claimed term "harvested" microbes. The fact that microbes are grown, cultured or conditioned on media of various contents for the purpose of selecting the most efficient variants of interest is clearly known in the prior art. The plain meaning of term "harvested" or harvesting microbes from a selection medium does not expand beyond some common protocols of collecting cells. Most important is the manner in "such" it has been done. The claimed invention does not point out the "manner such" as it might be intended. Thus, the arguments based on cell improvements resulting from plain and simple harvesting do not appear to have persuasive grounds.
